PRASHANTH N

Senior Software Engineer | AI Systems | Machine Learning | Data Platforms

Engineer specializing in scalable AI systems, machine learning infrastructure, and backend platforms. 4+ years of experience building production ML systems, enterprise data pipelines, and cloud-native platforms used by thousands of users. Strong focus on applied AI, data engineering, and platform architecture.

Core Areas: Machine Learning • Backend Systems • Data Platforms • AI Applications • Distributed Systems • Cloud Infrastructure

EXPERIENCE

Senior Software Engineer — Jozuna (Numentica Group)

Remote | Jun 2023 – Jan 2026

Led backend and AI system architecture for **DiscoverMySkills**, an AI-powered learning platform used by institutions and organizations.

Impact

- Designed large-scale candidate onboarding pipeline supporting **10,000+ users via automated Excel ingestion workflows**.
- Built extensible assessment platform supporting MCQ, descriptive, image, audio, and video question formats.
- Developed AI-driven question generation system creating categorized questions by topic, difficulty, and competency.
- Architected multi-tenant authentication and role systems supporting candidates, institutes, corporates, parents, and administrators.

- Implemented skill scoring framework evaluating **18+ competency dimensions** including communication and analytical thinking.
- Built learning analytics dashboards tracking performance, engagement, and progress across multiple organizations.
- Developed automated content pipeline converting presentations into AI-enhanced video learning modules.

Technologies Python, FastAPI, AWS, Machine Learning, Data Pipelines

Senior Engineer — Numentica LLC

Bangalore, India | Jun 2023 – Apr 2025

Worked on enterprise-scale cloud data platforms and machine learning systems.

Impact

- Designed cloud-native analytics platform architecture using AWS services.
- Built RESTful APIs enabling secure integration between internal systems and external services.
- Developed large-scale ETL pipelines supporting analytics and ML workflows.
- Created synthetic data generation frameworks accelerating Proof-of-Concept and RFP development.
- Conducted exploratory data analysis and applied ML models to identify correlations and predictive insights.
- Implemented cloud monitoring and cost optimization strategies across AWS workloads.

Technologies Python, AWS, Data Engineering, Machine Learning, SQL

Software Engineer — Isteer Technologies

Jan 2022 – Jun 2023

Worked on industrial AI systems, predictive analytics, and enterprise application platforms.

Impact

- Generated synthetic datasets simulating industrial machine behavior within **4% modeling error**.

- Built ML models predicting machine energy consumption and failure rates using Random Forest and SVM.
- Developed CNN-based multimodal detection system identifying thunder events in wind turbines.
- Built deep learning models forecasting water requirements using soil moisture sensor streams.
- Designed dynamic no-code application framework enabling modular UI creation.
- Implemented automated messaging system delivering operational alerts to 300+ users in minutes.

Technologies Python, Machine Learning, Deep Learning, Data Engineering

SELECTED AI & ML PROJECTS

AI Learning Recommendation System

Built learning analytics engine analyzing assessment performance and behavioral data to generate personalized learning paths.

Technologies Python • ML Models • Data Analytics

TECHNICAL SKILLS

Programming Python, SQL

Machine Learning Scikit-learn, TensorFlow, PyTorch, OpenCV, NLTK

Data Engineering ETL Pipelines, Data Modeling, Feature Engineering, Exploratory Data Analysis

Cloud AWS (S3, DynamoDB, Lambda), Google Cloud (BigQuery, GCS, Composer)

Backend Systems FastAPI, REST APIs, Distributed Systems

Tools Docker, Git, Postman, Jupyter

EDUCATION

MTech — Artificial Intelligence and Data Science

PES University, Bangalore | 2025 – 2027

Focus Areas Machine Learning • Intelligent Systems • Applied AI

Bachelor of Engineering — Information Science

Visvesvaraya Technological University | 2017 – 2021

Focus Areas Data Structures • Algorithms • Machine Learning • Databases

ADDITIONAL

Languages English • Kannada • Telugu • Tamil

Interests AI Systems Engineering • Research-driven Machine Learning • Scalable Platform Architecture
